

Botanical name:
Acacia pendula

Common name:
Weeping Myall

Origin:
Eastern Australia, mainly the western side of the Great Dividing Range

Typical height:
8-10 metres

Typical width:
5-8 metres

Growth rate:
Moderate to fast.

Typical form:
Spreading or erect tree with pendulous branches.

Characteristics:
Small to moderate sized evergreen tree. Striking blue-grey, narrow foliage. Bark rough, fissured and dark grey. Bright yellow globose flowers.

Site requirements:
Widespread in inland areas. Often grows in alluvial soils. It is also found in relatively heavy clay soils in Victoria. Its natural habitat gets between 400-600 mm annual rainfall.

Tolerances:
High drought tolerance. Tolerant of frosts.

Notes:
Very ornamental small to moderate sized tree with good tolerances for Dubbo area.
